1 Introduction

1 This document is the Quality Manual for the Swedish Certification Body for IT Security (CSEC).

2 For general information on the Swedish Common Criteria Evaluation and Certification Scheme ("the Scheme"), see Scheme publication SP-001 *Certification and Evaluation Scheme - Scheme Overview* where you also find lists of abbreviations commonly used by CSEC.

3 This document provides a detailed description of the organisation and processes within the Certification Body (CB). It is primarily intended for the Certification Body personnel, but may also be of interest to evaluators, sponsors, developers and other parties who want to gain a better understanding of the Quality Management System.

1.1 Background

4 CSEC is an entity within the Swedish Defence Materiel Administration (FMV) responsible for implementing the Scheme.

5 In the *Ordinance with instructions for the Swedish Defence Materiel Administration* (SFS 2007:854) the Swedish government has stated that at the FMV there is a Certification Body that should establish and operate a Certification Scheme for security in IT-products and systems. FMV should act to obtain and maintain international recognition for issued certificates.

6 In the *Appropriation Directions for the Swedish Defence Materiel Administration*, the Swedish Department of Defence has stated that FMV shall be Certification Body for security in IT-products and systems and should establish and operate a Certification Scheme for security in IT-products and systems. FMV shall act as national Certification Body within the Common Criteria Recognition Arrangement (CCRA) and should act to obtain and maintain international recognition for issued certificates. FMV should co-operate internationally in order to make the methodology for evaluation and certification more effective and should give support and guidance in using Common Criteria (CC) for requirements specification.

7 The mission of the Certification Body is documented in VB-140 *Verksamhetsbeskrivning* (in Swedish) and in related documents within FMV.

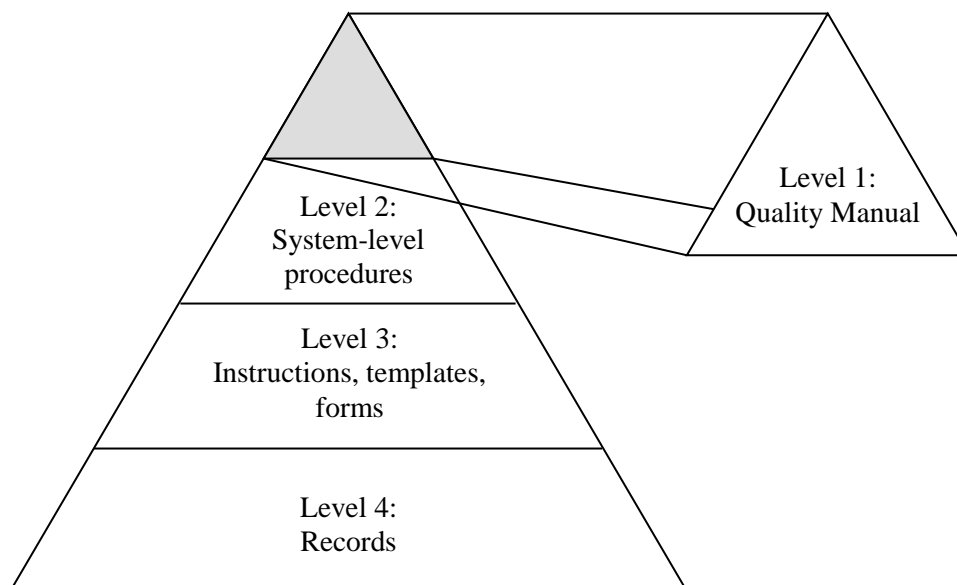

1.2 Documentation

1.2.1 Structure of the Quality Management System

8 The policies and procedures of the Certification Body are documented in the Quality Management system. The documents in the Quality Management System are arranged in a structure with four levels, each representing a more detailed level of abstraction, as follows.

- Quality Manual
- System-level procedures
- Instructions, templates, forms
- Records

Swedish Certification Body for IT Security
007 Quality Manual

Quality Manual (this document)

9 The Quality Manual is the top-level document in the Quality Management System as required by ISO/IEC 17065:2012.

10 The Quality Manual states the policy and strategies of the Certification Body and describes the overall Quality Management System including management and organisation.

11 The Quality Manual defines obligations and responsibilities and refers to the procedures of the Quality Management System.

System-Level Procedures

12 System-level procedures are high-level instructions that describe procedures, functions, and processes in terms of “why”, “what”, “how”, and “when”. They are cross-functional in the sense that they clearly identify the responsibilities of different organisations and departments.

13 System-level procedures may reference other documentation, such as specific instructions.

Instructions, Templates, and Forms

14 Instructions are the most detailed description level. They contain information about “how” the different tasks actually are performed. Instructions consist of the following types of documentation.

- Descriptive documents
These documents contain detailed controlling descriptions. Examples of documents in this category are procedures, definitions of roles, job descriptions, definitions and abbreviations, policies, and declarations.
- Plans and detailed descriptions
These documents describe the instantiation of the overall policies and procedures for specific projects or tasks.
- Temporary Quality Management Notes
Notes issued by the Quality Manager clarifying aspects about using the Quality Management System or, after decision by the Change Control Board, describing a deviation from an authorised version of the Quality Management System.

- Process web
Most common FMV-Instructions are defined as processes, activities, and activity steps in *FMV VHL*. Currently no instructions of the Certification Body are described in this way.
- Other documents
Everything else, such as forms, templates, or checklists, which are a part of the Quality Management System.

Records

15 Records are the documentation evidence of activities performed or results achieved. Records provide evidence of conformity to requirements and of the effective operation of the Quality Management System.

1.2.2 Requirements

16 The Quality Management System of the Certification Body is designed to meet the requirements of the following national and international standards and regulations.

- International Organisation for Standardisation/International Electrotechnical Commission (ISO/IEC) – ISO/IEC 17065:2012
Conformity assessment – Requirements for bodies certifying products, processes and services
- Common Criteria Recognition Arrangement (CCRA)
Arrangement on the Recognition of Common Criteria Certificates in the field of Information Technology Security
- Senior Officials Group Information Systems Security (SOGIS)
Mutual Recognition Agreement of Information Technology Security Evaluation Certificates

17 The following documents contain requirements and conditions for accreditation for the Certification Body. These requirements apply to the accreditation process and set up conditions for accredited bodies and are not traced within the Quality Management System.

- STAFS 2015:8
Föreskrifter och allmänna råd om ackreditering
(English: *Regulations and General Guidelines (STAFS 2015:8) on Accreditation*)
- STAFS 2013:5
Föreskrifter och allmänna råd om ackreditering av organ som certifierar produkter
(English: *Regulations and General Guidelines for Accreditation of Bodies that Certify Products*)

1.2.3 Version Description Documents

18 The purpose of a version description document (VDD) is to identify all documents and versions of these documents that constitute a specific version of the Quality Management System. There may be different version description documents for different parts of the Quality Management System. A version description document identifies all formal relationships between the documents in the Scheme.

19 A new version of a version description document is created each time a new version of a document referenced in the version description document is approved. A new version of the version description document is approved each time a new version of the referred part of the Scheme is to be published.

1.2.4 Valid Versions of the Scheme

20 It is always the current version of the Quality Management System and the Scheme
that is used by the Certification Body.

21 When the Scheme is updated, the Quality Manager is responsible for ensuring that
transition guidelines are established to the extent required to fulfil the Quality Objec-
tives of the Certification Body and to maintain the effectiveness and efficiency of the
Certification Body 's activities.

22 The version of the Scheme used for a specific review, or oversight activity, will be
documented in the technical oversight report (TOR) together with the impact of
changes made to the Scheme.

23 All versions of the Scheme used during a Certification will be listed in the Certifica-
tion Report, together with an analysis of the impact of all changes made to the Scheme
during the Certification.

1.3 Publications

24 Parts of the Quality Management System and the Scheme, which contain information,
guidelines and requirements of interest to external interested parties, are published on
the external website of the Certification Body. Such documents are divided into three
subcategories:

- Scheme Publications (SP)
- Scheme Policies
- Scheme Notes (SN)

25 It should be noted that the distinction between Scheme Publications, Scheme Policies
and Scheme Notes may, in some cases, be subtle and may depend on the time frame in
which the description is valid or the occasion on which it is issued.

26 Policies and procedures for these documents may be found in section 7.1, *The Quality
Management System*.

1.4 Definitions

27 For the purposes of this manual, the relevant definitions given in ISO/IEC Guide 2 and
ISO 9000 and ISO/IEC 17065 apply.

2 Arrangements on Mutual Recognition

28 Certificates issued under the Scheme may be subject for mutual recognition according to the following arrangements:

- Common Criteria Recognition Arrangement (CCRA)
- European co-operation for Accreditation Multilateral Agreement (EA MLA)
- Senior Officials Group - Information Security Mutual Recognition Agreement (SOGIS-MRA) of Information Technology Security Evaluation Certificates

29 A customer who applies for certification will be able to choose which mutual recognition agreement the certificate should be covered by. If the customer requires a product to be covered by more than one agreement, different certificates will be issued for each agreement.

30 A customer may also choose not to have a certification covered by any mutual recognition agreement. A certificate resulting from such a certification will be called a National Certificate.

2.1 Common Criteria Recognition Arrangement (CCRA)

31 Certification bodies accepted by the participants of CCRA as compliant may issue certificates that are recognised, under the conditions of the arrangement, by all participants of CCRA.

32 Regulations for mutual recognition are documented in the Arrangement on the Recognition of Common Criteria Certificates in the field of Information Technology Security and in corresponding documents issued within CCRA.

33 FMV/CSEC is accepted as an Associated Certification Body by the members of CCRA.

2.2 European Accreditation Multilateral Agreement (EA MLA)

34 Certification bodies accredited by an approved accreditation body within the EA may issue certificates that are recognised, under the conditions of the stipulated by EA regulations, by all signatories of the EA MLA for the scope of product certification.

35 The Swedish Board for Accreditation and Conformity Assessment (Swedac) has issued regulations for bodies that certify IT security. These regulations specify conditions for accreditation and are documented in Swedac STAFS 2015:8 and 2013:5.

36 FMV/CSEC is accredited by Swedac according to these regulations.

2.3 Senior Officials Group - Information Security Mutual Recognition Agreement (SOGIS-MRA)

37 Certification bodies accepted by the participants of SOGIS-MRA as compliant may issue certificates that are recognised, under the conditions of the agreement, by all participants of SOGIS-MRA.

38 Regulations for mutual recognition are documented in the SOGIS - Mutual Recognition Agreement of Information Technology Security Evaluation Certificates and in corresponding documents issued within the SOGIS-MRA.

39 FMV/CSEC is accepted as a Certification Body, up to evaluation assurance level 4 (EAL4), by the participants in the agreement.

2.4 National Certificates

40 Performing a certification resulting in a National Certificate may be relevant in Certifications where the requirements for mutual recognition could not be met, but where the customer would want to perform a certification according to the same principles.

41 Conditions leading to a National Certificate may be, for example, that the security classification of the Security Target or the certification report means that they cannot be published according to the requirements for mutual recognition.

42 Such certifications will be performed according to the applicable parts of the Scheme and the Quality Management System. Any deviations will be addressed in the certification report.

3 Policy

3.1 Objectives for Quality

43

The quality objectives for the Certification Body are as follows.

- To fulfil the requirements for accreditation as stated by the accreditation body
- To fulfil the requirements for recognition as a compliant Certification Body as stated within the CCRA
- To fulfil the requirements for recognition as a compliant Certification Body as stated within SOGIS-MRA
- To improve the availability of evaluated, security-enhanced IT products and protection profiles (PP)
- To perform certifications in a cost-effective way where efforts are concentrated to the areas where most benefit is gained with respect to national, as well as commercial, needs for secure products
- To continuously improve the efficiency and cost-effectiveness of the evaluation and certification process for IT products and protection profiles by participating in international technical communities regarding CCRA
- To ensure that evaluations and certifications are performed to high and consistent standards and will promote confidence in the security of IT products certified under this Scheme
- To fulfil the expectations from customers, as well as other interested parties, regarding level of judgement in an equivalent manner in certification reviews
- All assignments shall be executed within the time limits agreed with the customers to the Certification Body, especially the following:
 - Reports received in certification assignments shall be reviewed and answered within the time frame agreed with the customer.
- To continuously improve the efficiency and cost-effectiveness of the evaluation and certification process for IT products and protection profiles by participation in continuous improvements by all employees at CSEC

Comments to the objectives for quality

44

The following comments will help understanding the background to the objectives for quality.

- The standards according to which the Certification Body operates are set out by the regulations for accreditation and for approval within the CCRA. The objective to fulfil these requirements implies high standards for qualities such as impartiality and confidentiality and also for a defined level of operation for management and organisation, procedures for document management, well-structured procedures for change management, and for how the certification service shall be organised and performed.
- It is of vital importance for the trust and the confidence in the services of the Certification Body that it meets all time agreements made with its customers. Although the Certification Body cannot control in detail when reports are received from the evaluation facilities it is an obvious objective for the service quality to always respond within the time agreed with the customer.

- The requirement on the certification service is that it is repeatable and reproducible, independent of who is performing the certification. It is important that the level of judgement is aligned with the market expectations for secure products as well as with the requirements from authorities and from customers of such products. Through proper information and benchmarking it is the objective of the Certification Body to set the level of judgement neither below nor beyond the level of expectations from customers and other parties with significant interest in the scheme.
- Evaluations and certifications are performed with financial resources provided by the customers. It is important that time and money is spent in an effective way in respect of identified vulnerabilities while creating and preserving confidence in the certification system.

3.2 Policy for Quality

45

The quality policy defines the overall intentions with respect to quality and is established by the management of the Certification Body.

46

The quality policy of the Certification Body is as follows.

- The Certification Body operates a documented Quality Management System that complies with the CCRA agreement, with the SOGIS mutual recognition agreement, and with the regulations for accreditation issued by Swedac.
- The Certification Body operates structured and effective procedures for change management, safeguarding continuous improvement of the Quality Management System with respect to identified nonconformities and changes in internal, as well as external, requirements and conditions.
- The Certification Body constantly evaluates its procedures for certification and uses international benchmarking to ensure that resources and efforts for certification are effectively and efficiently applied with respect to IT security benefits.
- The Certification Body plans its assignments based on its staff resources and estimated work-load in such a way that agreements about time limits are always met.
- The Certification Body provides its services in an impartial and non-discriminatory manner to all applicants whose activities fall within our field of operation by strict adherence to Scheme rules, regardless of the status of the potential Sponsor of a certification.
- The Certification Body provides its services at prices adapted to market conditions to all applicants whose activities fall within our field of operation, with no undue financial or other conditions.
- The procedures under which the Certification Body operates are administered in a non-discriminatory manner.
- The Certification Body takes complete responsibility for all decisions relating to granting, maintaining and withdrawing certification.
- The Certification Body has established a Scheme Advisory Committee (SAC) to enable the participation of all significant interested parties in the development of policies and principles regarding the content and functioning of the certification system.

3.3 Applicable Legislation

47

A description of the national laws, subsidiary legislation, administrative regulations, and official obligations that apply to and affect the certification activities and the recognition of CC certificates is provided in CB-136 *Legal Dependencies*.

4 Independence and Impartiality

48 The Certification Body is impartial in the sense that it is free from any influence by anyone having commercial or financial interest in the outcome of the certifications.

49 The Certification Body is organised as an independent entity within the FMV, which is a civil Government authority.

50 A public authority is by law established to be independent and impartial towards any commercial or financial interest.

51 Since the Certification Body is a part of a public authority the permanent personnel of the Certification Body are Swedish civil servants for which the *Swedish law on public employment* applies.

52 The law requires a civil servant not to engage in situations or actions where his impartiality may be questioned or that may harm the confidence in the authority. The law also stipulates how such situations shall be handled.

53 The organisation of the Certification Body is implemented to safeguard impartiality in every aspect of the Scheme and is described in section 6, *Management and Organisation*.

54 The characteristics of the Senior Executive are described in section 6.2.1, *Management Roles*.

55 The participation of all parties significantly concerned in the development of policies and principles regarding the content and functioning of the certification system is enabled through the Scheme Advisory Committee, which is described in section 6.3.1, *Scheme Advisory Committee*.

56 The Certification Body forms a part of the legal entity The FMV. The relationship with FMV is described in section 4.3, *Separate Legal Entity*.

57 An overall description of the organisation for independence of the Certification Body is found in VB-140 *Verksamhetsbeskrivning* (in Swedish).

4.1 Policy for Independence and Impartiality

4.1.1 Background

58 The Certification Body is to ensure impartiality and independence at the following three levels.

- Strategy and policy
- Decisions on certification
- Evaluation

4.1.2 Policy

59 Independence and impartiality towards FMV is safeguarded as follows.

- Policies issued by FMV's Board apply also to the Certification Body.
- The Certification Body has a Quality Management System of its own which is described in the Quality Manual (this document).
- The operational management of the Certification Body has the exclusive authority to issue CSEC policies for the Certification Body to the extent necessary to maintain impartiality and independence in the sense described above.
- Policies for the Certification Body are issued by the Head of the Certification Body after consulting with the Senior Executive.

- The Scheme Advisory Committee shall review these rules and the observance of the rules and shall recommend actions based on any nonconformity.
- Personnel may not be used to review or make a certification decision for a product for which they have provided consultancy within the last two years.
- Any nonconformity regarding the observance of these rules shall be reported to the Scheme Advisory Committee.

60 Further information about the organisation and the management functions may be found in VB-140 *Verksamhetsbeskrivning* (in Swedish).

4.2 No Compromising Activities

61 The main purpose of the Certification Body is to provide certification services according to the Scheme.

62 The Certification Body does not manufacture or trade in any products or systems certified under the Scheme.

63 On some occasions, the Certification Body may be involved in providing advisory services in its area of competence. Such activities will be performed according to specific policies and procedures clearly distinguished from the product certification. The Certification Body does not give prescriptive advice or consultancy as part of an ongoing certification.

4.3 Separate Legal Entity

64 The Certification Body is organised as an independent entity within the FMV, which is a civil government authority. The Certification Body is an integrated part of FMV and will make use of the overall Quality Management System of FMV and will adhere to FMV's overall policies as long as impartiality and independence is not compromised.

65 Further information about the organisation and the management functions may be found in CB-101 *Roller - Specifikation*.

66 The legal status of the Certification Body is described in detail in VB-140 *Verksamhetsbeskrivning*. (in Swedish).

67 The Certification Body has investigated and documented its relationship to the FMV and has concluded that policies and procedures established within the Certification Body eliminate any risk that would affect confidentiality, objectivity, or impartiality. The details are documented in CB-078 *CSEC Relations with The Swedish Defence Materiel Administration*.

4.4 Risk Analysis

4.4.1 Risk Imposing Situations

68 Situations that, according to ISO/IEC 17065:2012, might impose a risk include:

- self-interest (e.g. overdependence on a contract for service or the fees, or fear of losing the customer or fear of becoming unemployed, to an extent that adversely affects impartiality in carrying out conformity assessment activities);
- self-review (e.g. performing a conformity assessment activity in which the Certification Body evaluates the results of other services it has already provided, such as consultancy);
- advocacy (e.g. a Certification Body or its personnel acting in support of, or in opposition to, a given company which is at the same time its customer);

- over-familiarity, i.e. risks that arise from a Certification Body or its personnel being overly familiar or too trusting, instead of seeking evidence of conformity (in the product certification context, this risk is more difficult to manage because the need for personnel with very specific expertise often limits the availability of qualified personnel);
- intimidation (e.g. the Certification Body or its personnel can be deterred from acting impartially by risks from, or fear of, a customer or other interested party); and
- competition (e.g. between the customer and a contracted person).

69

Such situations will be analysed during the risk analysis.

4.4.2 Yearly Risk Analysis

70

The Certification Body will perform a risk analysis regarding impartiality and independence. The analysis will cover, but not be limited to, all aspects listed in section 4.4.1 *Risk Imposing Situations*.

71

This risk analysis will be updated yearly in conjunction with the Management Review. The procedure for risk analysis is described in VB-186 *CSEC Ledning* (in Swedish). The Management Review is described in CB-117 *Quality and Change Management*.

72

During the risk analysis the relations with the FMV, described in CB-078 *CSEC Relations with The Swedish Defence Materiel Administration*, will be analysed. Any change in this relationship will lead to an update to the document, together with the necessary actions to prevent any risk identified.

4.4.3 Risk Analysis when Staffing

73

When staffing a Certification or Licensing project any risk to the impartiality and independence of the assignment will be analysed.

74

The analysis will cover the relevant aspects of section 4.4.1, *Risk Imposing Situations*. Details about such analysis are described in CB-111 *Certifying* and in CB-110 *ITSEF Management*.

4.4.4 Continuous Risk Analysis

75

As a complement to the Yearly risk analysis and the Risk analysis when staffing projects, the Certification Body will address risks continuously at management and personnel meetings.

76

Meetings within the Certification Body are described in VB-186 *CSEC Ledning* (In Swedish)

4.4.5 Reporting to the Scheme Advisory Committee (SAC)

77

The Quality Manager is responsible for making information about any identified risk to impartiality, including actions taken to eliminate or minimise the risk, available to the Scheme Advisory Committee (see section 6.3.1, *Scheme Advisory Committee*).

5 Confidentiality

78 The Certification Body shall, to the extent permitted by the national laws, statutes,
executive orders, or regulations of the participants, have adequate arrangements to en-
79 sure confidentiality of the information obtained in the course of its certification activi-
ties at all levels of its organisation and is not to make an unauthorised disclosure of
protected information obtained in the course of its certification activities.

Documents received by, or drawn up by, the Certification Body are by definition offi-
80 cial documents, which means that they may be kept secret only in order to protect the
interests listed in The Freedom of Press Act and by referring to the correct article in
The Swedish Law on Publicity and Secrecy.

Details on how to send documents and make the Certification Body aware of confi-
81 dentiality claims and procedures for exchanging confidential information are de-
scribed in SP-001 *Certification and Evaluation Scheme - Scheme Overview*.

The Certification Body has established procedures and arrangements consistent with
82 applicable laws to safeguard confidentiality of the information obtained in the course
of its certification activities. These are described in more detail in section 8, *Personnel
Management*, and in section 15, *Security*.

Where the law requires information to be disclosed to a third party, the supplier will
83 be informed of the information provided as permitted by the law.

All persons that take part in certifications or come into contact with information gath-
ered during certifications are required to sign an agreement whereby they assure that
they understand and will comply with the confidentiality policy described above. This
applies to all personnel and contractors.

6 Management and Organisation

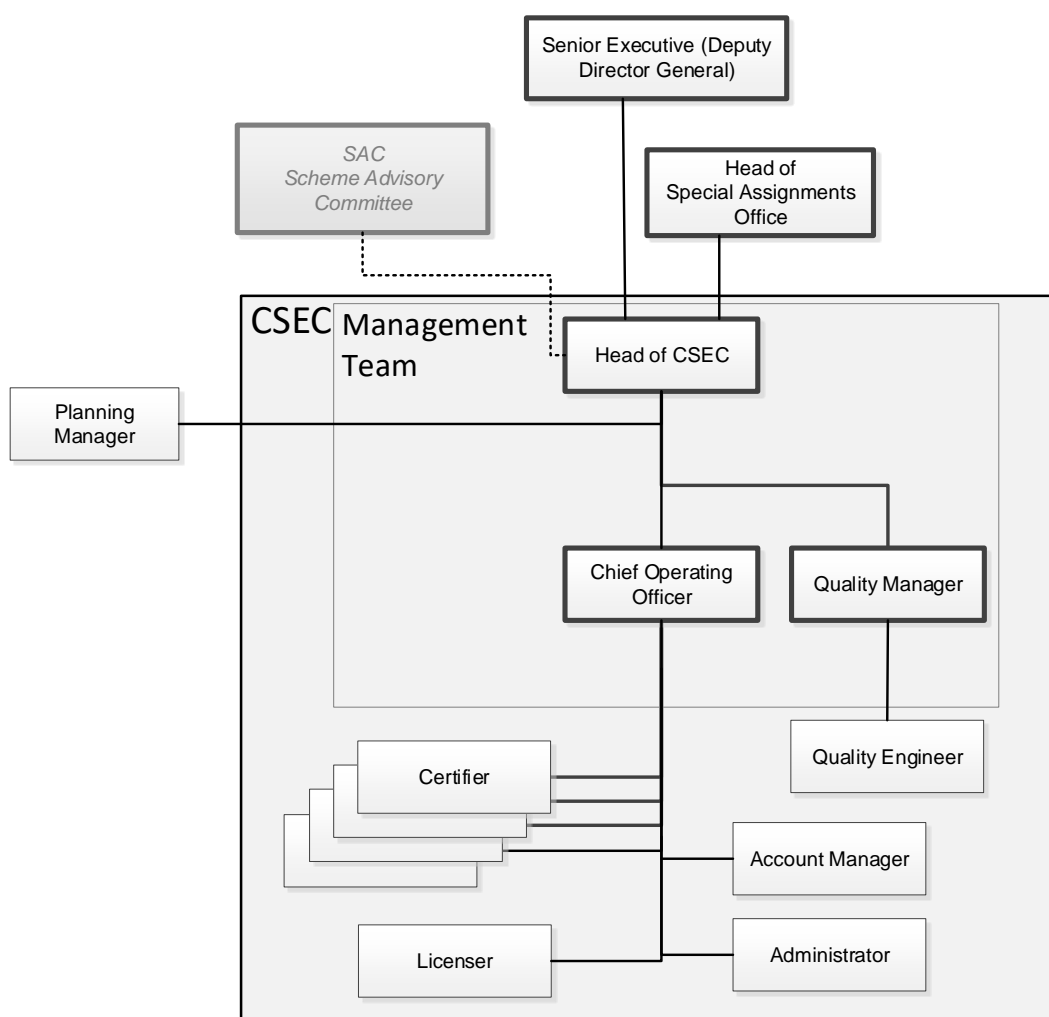

6.1 Organisation

84

The purpose of the organisation description is to identify the management that has overall responsibility for all of the following.

- Performance of testing, inspection, evaluation, and certification as defined in the Quality Management System
- Formulation of policy matters relating to the operation of the Certification Body
- Decisions on certification
- Supervision of the implementation of its policies
- Supervision of the finances of the Certification Body
- Delegation of authority to committees or individuals as required to undertake defined activities on its behalf
- Technical basis for granting certification

Figure: CSEC Roles

6.1.1 Organisation Description

85 Further information about the organisation and the management functions may be found in VB-140 *Verksamhetsbeskrivning* (in Swedish).

6.2 Roles

86 This section gives a brief introduction to the different roles in the Certification Body and to each role's responsibilities in the Quality Management System and the Scheme, with the purpose of describing how the requirements from ISO/IEC 17065:2012 and CCRA are fulfilled.

87 For a full description of the roles and the organisation, see CB-101 *Roller Specifikation* and VB-140 *Verksamhetsbeskrivning* (in Swedish).

88 Personnel Management is described in section 8, *Personnel Management*.

89 Assignment of roles within the Certification Body is made through a Staffing Decision¹ made by the Head of CSEC.

6.2.1 Management Roles

90 The following roles are part of the overall management of the Certification Body. They are described in more detail in CB-101 *Roller - Specifikation*.

Senior Executive

91 The Senior Executive is responsible for enabling day-to-day operations and setting objectives for the Certification Body.

92 The Senior Executive reports to FMV's Board.

Head of the Certification Body

93 The Head of the Certification Body, also called Head of CSEC, is responsible for the day-to-day operations within the Certification Body. The Head of the Certification Body reports to the Senior Executive.

94 The Head of the Certification Body also has the overall responsibility for Scheme changes and the handling of complaints and appeals.

95 The Head of the Certification Body may not take part in evaluation activities.

Chief Operating Officer

96 The Chief Operating Officer is responsible for managing the day-to-day operations within the Certification Body, including certification and licensing activities, in cooperation with the Head of the Certification Body.

97 The Chief Operating Officer has the responsibility and authority to evolve and improve all aspects of the Scheme services and documentation.

98 The Chief Operating Officer reports to the Head of the Certification Body.

Quality Manager

99 The Quality Manager is responsible for establishing, implementing, maintaining, and operating the Quality Management System according to ISO/IEC 17065:2012 and other relevant requirements by CCRA, Swedac and FMV. The Quality Manager is also responsible for reporting on the performance of the Quality Management System to the Head of the Certification Body for review and as a basis for continuous improvement.

¹ "Bemanningsbeslut" in Swedish.

6.2.2 Other Roles

100 The following roles have responsibilities of vital importance in running the Scheme.

- Certifier
- Licenser
- Quality Engineer
- Administrator
- Account Manager

101 These roles are described in more detail in CB-101 *Roller - Specifikation*.

102 *Process roles* may be defined in the process where they operate.

6.3 Boards and Committees

6.3.1 Scheme Advisory Committee (SAC)

103 The Scheme Advisory Committee is established to enable the participation of all parties significantly concerned in the development of policies and principles regarding the content and functioning of the certification system.

104 The main purpose of the Scheme Advisory Committee is to ensure the impartiality of the operations of the Certification Body.

105 The Scheme Advisory Committee is described in Scheme publication SP-103 *Terms of Reference for the Scheme Advisory Committee*.

6.3.2 Management Team

106 The Management Team is established to handle strategic and overall management of the Certification Body.

107 The participants of the Management Team are as follows.

- Head of CSEC (Chairman)
- Chief Operating Officer
- Quality Manager

6.3.3 Change Control Board (CCB)

108 The Change Control Board is established to manage and control the procedures for change management and handling of nonconformities.

109 The participants in the Change Control Board are as follows.

- Head of CSEC
- Quality Manager (Chairman)
- Chief Operating Officer
- Administrator
- Quality Engineer

110 Personnel with other roles may participate, and may be invited, but are not required.

111 Further information about the Change Control Board is found in CB-117 *Quality & Change Management*.

6.4 Financing

112

CSEC is a non-profit organisation. The Swedish Government will provide appropriation for the operation of the Certification Body. The yearly amount will be described in the *Appropriation directions for the Swedish Defence Materiel Administration*. The Certification Body will charge fees adjusted to market conditions for its services. For further information about charges and fees, see Scheme publication SP-008 *Charges and Fees*. The procedures for management of finances are described in VB-140 *Verksamhetsbeskrivning* (in Swedish).

6.5 Liabilities

113

As part of a civil government authority, all liabilities arising from the operations of the Certification Body will be handled according to *The Swedish Ordinance on the handling of claims for damages against the State*. The relationships between CSEC and its associated IT Security Evaluation Facilities (ITSEF), Sponsors, and Developers will be regulated in agreements that will cover liability aspects.

6.6 Project Management

114

All licensing and certification assignments are organised and managed as separate projects. Management of such projects are described in CB-110 *ITSEF Management* and CB-111 *Certifying*.

115

The procedures for project management are based upon the procedures described in *FMV VHL*.

6.7 Management Procedures

116

Procedures for overall management of projects, tasks and other assignments are described in CB-186 *CSEC Ledning*.

7 Quality and Change Management

7.1 The Quality Management System

7.1.1 Use and Deviation

117 The policies and procedures of the Quality Management System are intended to be the
best known practice to support the purpose and objectives of the Certification Body.
The level of detail may vary substantially between different types of descriptions, all
depending on the needs the procedure is to fulfil.

118 All work covered by the Quality Management System is to comply with these policies
and procedures at the defined level of detail. If a need to deviate from the documented
procedures arises, this is allowed only after consultation with the Quality Manager and
a decision by authorised management or permanent personnel. Such decisions are to
be properly documented, motivated, and traceable.

119 If a deviation is compelled by an error or nonconformity in the Quality Management
System, or if the procedure is regarded as inefficient, a deviation shall always be pre-
ceded by a change request describing the problem leading to the need for a deviation.

120 If the deviation is caused by the circumstances for a specific task or project a change
request is not required but the reason for the deviation must be clearly stated when the
decision is documented.

7.1.2 Document Categories

121 The Quality Management System consists of the documentation described in section
1.2, *Documentation*.

122 The Quality Management System and the Scheme consist of documents internal to the
Certification Body as well as publications briefly described in section 1.3, *Publica-
tions*. The main categories are distinguished by the prefix in the document identity.
There are three categories of documents in the Quality Management System and the
Scheme as follows.

Type	Description	Prefix
CB Documents	Internal documents related to the Evaluation and Certi- fication Scheme	CB
Unit documents	Internal documents not limited to the Scheme but rele- vant to CSEC as a unit within the FMV	VB
Public documents	Documents published on the external web providing information, guidelines and regulations to external in- terested parties	SP ²

123 For simplicity, all documents are based on the same template which is issued in Word,
and Excel versions. However there are some documents, mostly forms, which are
based on a template adapted for forms.

² These documents are complemented by Scheme Policies and Scheme Notes.

7.1.3

Publications

124

The public part of the documentation is divided into three subcategories as follows.

Scheme Publications Scheme Publications are the part of the Scheme included in the Quality Management System that describes, to external interested parties, the procedures for licensing of evaluation facilities, for evaluation and certification and finally for granting certification. Scheme Publications could contain regulations as well as guidelines for the parties involved in licensing and in evaluation and certification.

Scheme Publications are issued on the CSEC standard template.

Scheme Policies Scheme Policies describe how the Scheme is to be used or applied in different situations and how the Certification Body will act in situations not directly related to the procedures for granting Certification.

Scheme Policies are issued on the CSEC standard template.

Scheme Notes Scheme Notes are short descriptions of how to interpret the rules and regulations of the scheme. Scheme Notes may be issued as a result of a Request for Interpretation or as a result of an internal decision within the Certification Body.

Scheme Notes are published on the Scheme Note form and are limited to one, or at most two, pages. If there is need for more extensive documentation the Scheme Note should not be used and a Scheme Policy or a Scheme Publication should be considered.

7.2

Maintenance of the Quality Management System

125

The Quality Management System is maintained through the policies and procedures for quality and change management described in this section.

126

The effectiveness and efficiency of the Quality Management System are assessed on a yearly basis through internal audits, described in section 7.4, *Internal Audits*, and the management review, described in section 7.5, *Management Review*.

127

The Certification Body has procedures, described in CB-117 *Quality & Change Management*, for change management used to implement and follow up solutions for any nonconformity and any suggestion for improvement.

128

The Quality Manager is responsible for the maintenance of the Quality Management System.

7.3

Change Control

129

The purpose of the policies and procedures for change control is to ensure that:

- the views of all significant interested parties are taken into account when the change is implemented,
- no change is introduced without authorisation from the proper management representative, and
- all interested parties are promptly informed and are in a position to take prompt and effective action.

130

This is accomplished by the following rules.

- All changes are handled in a controlled manner according to the procedures in the Quality Management System.
- All changes must be approved by the Change Control Board before implementation.
- All changes with major impact on the operation of the Scheme are announced to the Scheme Advisory Committee and on the official website in advance of implementation of the change.
- The effectiveness and efficiency of all changes are continuously analysed by the Quality Manager and reported to the Head of the Certification Body.
- The effectiveness and efficiency of the procedures for change management are continuously analysed by the Quality Manager and reported to the Head of the Certification Body.

131 The procedures for change management, including procedures for analysis of the impact of the changes on ongoing Certifications are found in CB-117 *Quality and Change Management*.

7.4 Internal Audits

132 Internal audits are conducted according to a yearly schedule covering all procedures of the Quality Management System.

133 The internal audits are performed according to the procedures for internal audits described in CB-117 *Quality & Change Management*.

134 The Quality Manager is responsible for the planning of such audits and for the appointment of the audit team.

135 Each audit is documented in an audit report that is presented to the Head of the Certification Body and the Senior Executive.

136 All nonconformities are classified according to the classification guide found in Appendix A, *Classification of Nonconformities*, and are handled according to the procedures described in section 7.6, *Handling Nonconformities*.

7.5 Management Review

137 The management of the Certification Body conducts a Certification Body management review on a yearly basis.

138 The management review is performed according to the procedures for management reviews described in CB-117 *Quality & Change Management*.

139 The Quality Manager is responsible for scheduling and planning the management review. The Quality Manager is also responsible for all preparations and material needed.

7.6 Handling Nonconformities

140 Any suggestion for improvement and all findings that may represent a problem, defect or nonconformity shall be documented (as a change request) and reported to the Quality Manager.

141 The resolution may be a correction, a corrective action, a preventive action or a combination thereof.

142 A preventive action is an action to eliminate the cause of a potential nonconformity or other undesirable potential situation.

143 A corrective action is an action to eliminate the cause of a detected nonconformity or other undesirable situation.

144 A correction is an action to eliminate a detected nonconformity.
145 Nonconformities with major impact on the ability to fulfil the requirements for mutual
146 recognition are reported to the Senior Executive and the Scheme Advisory Committee.
147 The decisions about corrections, corrective actions and preventive actions are made by
at the Change Control Board (CCB).
148 Nonconformities are handled according the procedures described in CB-117 *Quality &*
Change Management. The details of the change control process are described in CB-
139 *Ändringsstyrning* (in Swedish).

7.7 Configuration Management

148 The Certification Body will introduce new versions of the Scheme and the Quality
Management System at regular intervals or when necessary.
149 The procedures for configuration management are used to establish a complete version
of the Scheme and the Quality Management System.
150 The Version Description Documents described in section 1.2.3, *Version Description*
Documents, will identify the versions of each document or process that constitute the
version of the Scheme and the Quality Management System.
151 Release notes that describe the changes since the previous version of the Scheme or
the Quality Management System will accompany each new version of the Scheme.
152 The procedures for configuration management are described in CB-149 *Releasehan-*
tering. (Eng: *Release Management*)

7.8 Changes in Requirements for Certification

7.8.1 Requirements from the Standards

153 The requirements for certification consist of the standards described in section 11.3,
Relevant Standards
154 Changes to the standards will be introduced according to the regulations issued by the
organisation responsible for the standard.
155 The standards, and the versions of these standards, used in a certification will be doc-
umented in the Certificate and in the certification report.

7.8.2 Scheme Regulations

156 The Scheme and the Quality Management System mainly consist of procedural regu-
lations but may impose requirements for certification.
157 A change to the Scheme and the Quality Management System that would represent a
change to the requirements for certification will be handled as follows.

- The change will be managed according to the procedures for change control de-
scribed in section 7.3, *Change Control*.
- All parties affected by the change will be informed according to the procedures
described in section 7.9, *Information about Changes*.

158 Changed requirements for certification, introduced through changes to the Scheme, are
not mandatory if they were not made known to the customer before the Application
for Certification was made.
159 If such changes are introduced, and not applied to an ongoing certification, this will be
described in the certification report.

7.8.3 Introducing Changed Requirements

160 If a customer wants a certification to be performed according to updated requirements the following actions will be taken.

- An analysis, identifying all parts of the evaluation and certification that are affected by the change, will be performed.
- A detailed analysis of how the evaluation and certification is affected will be performed.

161 If the customer wants to complete the change based on the result of the analysis, all parts of the evaluation and certification affected by the change will be updated.

162 These actions are performed under the responsibility of the Lead Certifier in each certification.

7.9 Information about Changes

163 The Certification Body is to ensure that changes are promulgated in such way that those who need to know are promptly informed and are in a position to take prompt and effective action. This is done through the procedures for information management described in section 10, *Information Management*.

164 The policy for information about changes is as follows.

- All changes to the Scheme are published on the official website.
- All changes with major impact on the operation of the Scheme are announced to the Scheme Advisory Committee and on the official website in advance of implementation of the change.
- All interested parties may subscribe to information about changes. Such information will be distributed by e-mail.

7.10 Accreditation

165 The Quality Manager is responsible for ensuring that the Certification Body, at all times, fulfils the requirements for accreditation as defined in relevant instructions from Swedac.

166 The Quality Manager is responsible for notifying the accreditation body of any changes that might affect the Certification Body's ability to fulfil the conditions for accreditation, as defined in section 10.4, *Information Related to Accreditation*.

167 If the Certification Body should wish to have its accreditation withdrawn, the Senior Executive is responsible for notifying the accreditation body of this, in writing.

168 If the Certification Body has had its accreditation withdrawn, the Head of the Certification Body is responsible for taking steps to ensure that no reference is made to the accreditation.

8 Personnel Management

169 The Certification Body, through FMV, employs permanent personnel and has access
to consultants to cover its operations.

170 The personnel include those working for the Certification Body, as well as persons
working under a formal agreement that places them within the management control
and systems/procedures of the Certification Body.

- Permanent personnel or employees, as used in the Quality Management System,
only include personnel employed by the Certification Body.
- Consultants, as used in the Quality Management System, work under a formal
agreement.
- Personnel or staff, as used in the Quality Management System, include both per-
manent personnel/employees and consultants.

8.1 Personnel Resources Administration

171 The Certification Body is formally organised within a unit at FMV. More information
about the organisation is found in VB-140 *Verksamhetsbeskrivning* (in Swedish).

172 The Head of the Certification Body is responsible for ensuring that the Certification
Body has a sufficient number of personnel for the type, range, and volume of work
performed.

173 The Head of the Certification Body will report needs for competence and personnel to
the Senior Executive and to the manager of the unit, in which the Certification Body is
organised. According to FMV's procedures it is the unit manager that is responsible
for assisting the Certification Body in providing sufficient resources.

174 Personnel involved in licensing and certification are assigned to work according to the
Quality Management System of the Certification Body.

175 The permanent personnel is ensured by the Senior Executive. The number of perma-
nent personnel cannot be changed without approval by the Head of the Certification
Body and authorisation from the Senior Executive. The details of these procedures are
documented in VB-140 *Verksamhetsbeskrivning* (in Swedish).

8.2 Financially and Commercially Independent Personnel

176 According to the requirements from ISO/IEC 17065:2012 and CCRA and according to
the policy of the Certification Body, the personnel of the Certification Body shall be
free from any commercial, financial, or other pressures that might influence the results
of the certification process.

177 Because the Certification Body is a part of a public authority, the permanent personnel
of the Certification Body are Swedish civil servants for which the *Swedish law on
public employment* applies.

178 The Head of the Certification Body is responsible for ensuring that all permanent per-
sonnel are informed about this law and in which situations it may be applicable.

179 The Head of the Certification Body is responsible for requesting all permanent per-
sonnel to report any condition necessary for the Certification Body to make judgement
on any complementary occupation on behalf of the employee.

180 For subcontractors and personnel working under a formal agreement see section 8.5
Agreement.

8.3 Competence Development

181 Competence development is performed according to the procedures for competence
development described in CB-202 *CSEC Kompetensledning* (in Swedish), and in *FMV*
VHL.

182 The manager of the FMV unit is responsible for competence development common to
all FMV permanent personnel and for maintaining plans for this competence devel-
opment.

183 The Head of the Certification Body has overall responsibility for competence devel-
opment that falls into the field of operation of the Certification Body.

184 The Chief Operating Officer has overall responsibility for any necessary supplement-
ary competence development needed within a project or a specific assignment.

8.4 Recruitment

185 Recruitment is performed according to the procedures described in *FMV VHL*.

186 During the recruitment process, the Head of the Certification Body is responsible for
the following.

- Ensuring that the permanent personnel is informed about the *law on public em-
ployment* and its impact
- Requesting the permanent personnel to report any condition necessary for the Cer-
tification Body to make judgement on any complementary occupation on behalf of
the employee

8.5 Agreement

187 When entering the Certification Body, all personnel, including those acting in a mana-
gerial capacity, and each subcontractor who will be involved in the certification pro-
cess will be required to sign the CB-057 *CSEC Impartiality agreement - Form* stating
that they will:

- comply with the rules defined by the Certification Body, including those relating
to confidentiality and independence from commercial and other interests;
- declare any prior and/or present association on their own part, or on the part of
their employer, with a supplier or designer of products relevant to the evaluation
or certification to which they are to be assigned; and
- reveal any situation known to them that may present them or the Certification
Body with a conflict of interest.

188 The Head of the Certification Body is responsible for ensuring that these agreements
are signed and saved in the personnel file.

189 The Head of the Certification Body is responsible for using the information as input
into identifying risks to impartiality raised by the activities of such personnel, or by
the organisations that employ them.

8.6 Personnel File

190 The Certification Body maintains information on the relevant qualifications, training,
and experience of all personnel involved in the certification process.

191 All records relevant for ensuring that the personnel involved in the certification pro-
cess have the necessary education, training, technical knowledge, and experience for
performing certification work are kept in individual personnel files.

192 The personnel files are described in CB-202 *CSEC Kompetensledning* (in Swedish).

8.7 Performance Monitoring

193

The management in charge of the operations of the Certification Body continuously monitors the performance of its personnel. Performance monitoring of the permanent personnel is described in CB-202 *CSEC Kompetensledning (in Swedish)*. Consultants are monitored through continuous discussions with the permanent personnel that is supported by the work of the consultant.

8.8 Individual Job Description

194

The roles in the organisation of the Certification Body are described in detail in CB-101 *Roller - Specifikation*. The document contains description of the duties and responsibilities for each role. The roles of Senior Executive, Head of the Certification Body, Chief Operating Officer and Quality Manager are considered to be of special importance to the quality of the Certification Body's services and are described in section 6.2, Roles, of this Quality Manual.

195

Each permanent personnel is appointed to one or more roles, by which the duties and responsibilities are uniquely identified.

8.9 Qualifications

8.9.1 Certifiers

196

Permanent personnel involved in certification activities will be designated as certifiers. Although higher evaluation levels require considerably more certification experience, no classification of certifiers is made based on specific evaluation assurance levels (EAL).

197

Certifiers should fulfil at least the following competence requirements.

- Bachelor or Master of Science in Engineering, or corresponding qualifications acquired in another manner
- At least 5 years of qualified technical experience in the field of IT security
- Completion of the CSEC Certifiers Training Course
- Participation in at least one evaluation effort
- Introduction to the Quality Management System of the Certification Body

198

Contracted personnel may be appointed as certifiers if they fulfil the requirements to become certifiers.

199

Decisions about appointments as certifiers are made by the Head of the Certification Body. Decisions shall be documented.

200

A diploma, signed by the Head of CSEC, is issued to each appointed certifier using CB-189 *Certifier Diploma - Form*.

8.9.2 Certifier Assistants

201

Personnel involved in certification activities may be designated as Certifier Assistants. Such personnel may perform certification tasks under close supervision of a Certifier.

202

Certifier Assistants should fulfil at least the following competence requirements.

- Post-secondary education in Engineering, or corresponding qualifications acquired in another manner
- Valid technical experience in the field of IT security
- Completion of the CSEC Certifiers Training Course, or education deemed equivalent by the Certification Body
- Introduction to the Quality Management System of the Certification Body

203 Decisions about appointments as Certifier Assistants are made by the Head of the
Certification Body and is documented.

8.9.3 Other Permanent Personnel

204 Permanent personnel other than Certifiers are appointed based on competence re-
quirements documented in CB-101 *Roller - Specifikation*. The appointments are made
by the Head of CSEC and shall be documented. See also CB-202 *CSEC Kompetens-
ledning* (in Swedish).

8.10 Assignments and Projects

205 The Chief Operating Officer is responsible for the assignments of the Certification
Body and assigns personnel for the necessary work.

206 Assignment of certification projects is described in CB-111 *Certifiering*. The Lead
Certifier acts as project manager for the certification project.

207 Assignment of licensing projects is described in CB-110 *ITSEF Management*. The
Licensor acts as project manager for the licensing project.

208 The Chief Operating Officer assigns the roles of the project. The Chief Operating Of-
ficer is responsible for ensuring that all personnel assigned to a project have relevant
competence for the tasks they are to undertake.

209 When assigning Certifiers to a certification project, the criteria for minimum relevant
competence described in section 8.9.1, Certifiers, must be taken into account.

210 The Head of the Certification Body is responsible for ensuring that neither the project
manager nor any other personnel assigned to the project have been involved in any of
the activities listed below with regard to the applicant or supplier in question or any-
body related to the supplier within the last two years.

211 The following activities or situations may present individuals involved in any part of
the certification process with a conflict of interest.

- Provision or design of products of the type that is to be certified
- Provision of advice or consultancy services to the applicant on methods of dealing
with matters that are barriers to the certification requested
- Present or previous involvement with the supplier of the product being evaluated

212 The Head of the Certification Body is responsible for investigating any such situation
and for taking appropriate actions.

213 The details of the FMV procedures are described in *FMV VHL*.

8.11 Reporting Conflicts of Interest

214 Each individual involved in certification activities is required to report to the man-
agement of the Certification Body any situation which may present the individual with
a conflict of interest.

215 The Head of the Certification Body decides how to handle each reported situation. The
decision shall be documented.

9 Document Management

9.1 Handling of Documents

216 Documents created within the Certification Body are produced, approved, registered, and archived according to the procedures for creating and updating documents in CB-173 *Dokumenthantering* (in Swedish).

217 Incoming documents are registered and archived according to the procedures for managing incoming documents in CB-173 *Dokumenthantering* (in Swedish).

9.2 Confidentiality

218 Because the Certification Body is a public authority, special rules regarding confidentiality of information and documents apply. The confidentiality policy for the Certification Body can be found in section 4.4.4, *Continuous*. By definition, documents received by or drawn up by the Certification Body are official documents to which the principle of public access to official documents is applicable.

9.2.1 Background Information

Official documents

219 A *document* is a presentation in writing or images or recording that can be read, listened to, or comprehended in another way, for example: using technical aids.

220 A document is *official* if it is:

- held by a public authority and
- according to special rules, regarded as having been received or drawn up by a public authority.

The principle of public access to official documents

221 The principle of public access to information means that the public and the mass media are entitled to receive information about state and municipal activities. The principle of public access to information is expressed in various ways. Those of importance to the Certification Body are as follows.

- Anybody whosoever may read the documents of authorities: *Access to official documents*.
- Civil servants and others who work for the state or municipalities are entitled to say what they know to outsiders: *Freedom of expression for civil servants and others*.
- Civil servants and others in the service of the state or municipalities have special powers to disclose information to newspapers, radio, and television: *Communication freedom for civil servants and others*.

9.2.2 Rules for Confidentiality within the Certification Body

222 Official documents within the Certification Body may be kept confidential according to the following articles in The Swedish Law on Publicity and Secrecy.

- | | |
|--------------------|---|
| 15 Chap. Art. 1, 2 | Regarding the security of the realm or its relationships with another state or international organisation |
| 17 Chap. Art. 1, 4 | Regarding inspection, control, or other superviso- |

	ry activities of a public authority
18 Chap. Art. 2, 8	Regarding the interest of preventing or prosecuting crime
19 Chap. Art. 1, 3	Regarding the economic interests of the public institutions
21 Chap. Art. 7	Regarding the protection of the personal or economic circumstances of private subjects
31 Chap. Art. 12, 16, 17, 20-23	
39 Chap. Art. 1, 2, 3, and 5	
223	Further details about the rules for confidentiality are documented in VB-132 <i>Sekretessregler CSEC</i> (English: <i>Rules for Confidentiality within CSEC</i>).
224	All personnel involved in licensing and certification are educated in the meaning of these rules and how the procedures for confidentiality within the Certification Body are implemented.
225	The procedures for confidentiality are described in VB-102 <i>Lokal säkerhetskyddsföreskrift</i> (English: <i>Local Security Regulation</i>).

9.3 Superseded Documents

226 The valid versions of all working documents are published either at the internal or the external website of the Certification Body according to the procedures described in section 10, *Information Management*. Such documents are marked with the following text.

Uncontrolled copy when printed

227 If documents are printed or copied from the website, they are no longer controlled and may not be used in licensing or certification unless the user can verify the correctness of the document.

228 Documents or versions of documents which are superseded or for any other reason no longer valid, are immediately withdrawn from the websites. Relevant interested parties are informed about the withdrawal and if applicable, about the new document or version.

9.4 Records

229 Since the Certification Body is part of a public authority the principle of public access to official records apply. This means that every document sent to the Certification Body, and every document drawn up within the Certification Body, will be registered in the diary and archived according to Swedish law. This applies to records as well as to any other document. Confidentiality is safeguarded by the policies and procedures described in section 5, *Confidentiality*, and in section 15, *Security*. Applicable legislation is listed in CB-136 *Legal Dependencies*.

230 The details of which records are produced and handled within the Certification Body are found in the description of the procedure in which the record is produced.

231 Records drawn up within the Certification Body are handled according to the procedures for document management described in this section and in CB-173 *Dokumenthantering* (in Swedish).

232 Incoming records, such as information gained within the Licensing and Certification processes are, handled according to the procedures for document management described in this section and in CB-173 *Dokumenthantering* (in Swedish).

233 Since records are official documents, they are stored in public archives according to the procedures for archiving described in section 9.1, *Handling of Documents*.

10 Information Management

234 The purpose of the procedures for information management is to ensure that all significant interested parties always have information about and access to the relevant documentation and information about the Scheme. The primary channel for spreading information to external parties is the website of the Certification Body.

235 The website of the Certification Body shall be updated when:

- a new version of the Scheme or the Quality Management System has been issued,
- a certificate has been issued or withdrawn,
- an interpretation has been issued or withdrawn, or
- information about a licensed ITSEF has changed. (e.g., licensing status, address)

236 Interested parties shall be notified by e-mail through predefined send lists.

237 Changes or prospective changes to Swedish laws, administrative regulations, or official obligations, or evaluation and certification operations or procedures that may affect the ability of the Certification Body to act consistently with the terms of the CCRA shall be distributed by the Certification Body through the Swedish CCRA Member to participants.

238 New Certificates and certification reports will be made available on the website of the Certification Body and to CCRA participants.

239 All documents published electronically will be made available in PDF format except for forms that will be published in MS Word format.

10.1 Distribution

240 The Certification Body will maintain a list of all appropriate documents including information about issue and/or amendment status.

241 Distribution of all such documents is controlled to ensure that the appropriate documentation is made available to personnel of the Certification Body and to all relevant interested parties, depending on the contents of the document.

- The Administrator is responsible for keeping the website of the Certification Body updated about the general documentation maintained by CSEC.
- The Administrator is responsible for providing notifications to external requestors whenever the document is changed, according to instructions in CB-124 *Informationsledning*.
- The Administrator is responsible for the publication of all new versions of public documents on the CSEC website.
- The Scheme documentation, including the lists of certified products and protection profiles, is published on the CSEC website and may also be requested through contact with the Administrator or the Certification Body.
- All documentation produced by the Certification Body is stored and archived according to the procedures in section 9, *Document Management*.
- The Administrator is responsible for ensuring that all documentation that needs to be available to the personnel of the Certification Body, including its subcontractors, is published in proper format on the internal web of the Certification Body.
- The Administrator is responsible for the information to be provided to the participants of the CCRA according to the description in section 10.3, *Information to Participants*.
- The Administrator is responsible for the document list, including amendments, according to the procedures in section 9, *Document Management*.

242

Details about distribution of documents are described in CB-124 *Informationsledning*.

10.2 Publishing

243

The table below indicates which information is to be published and in which document the information is originally found. These documents are published at the CSEC website.

Information	Source document
Information about the authority under which the Certification Body operates	SP-007 Quality Manual
Documented statement of the product certification system, including the rules and procedures for granting, maintaining, extending, suspending, and withdrawing certification	SP-007 Quality Manual SP-002 Evaluation and Certification
Description of the means by which the organisation obtains financial support	SP-007 Quality Manual
General information on the fees charged to applicants and to suppliers of certified products	SP-008 Charges and Fees
Description of the rights and duties of applicants and suppliers of certified products	SP-002 Evaluation and Certification
Requirements, restrictions, or limitations on the use of the Certification Body's logo and on claims related to the certification granted	SP-001 Certification and Evaluation Scheme - Scheme Overview
Information about procedures for handling complaints and appeals	SP-007 Quality Manual
Information about withdrawn CC Certificates	
Directory of certified products and their suppliers	
Directory of interpretations	
Directory of explanations	

244

The Head of the Certification Body is responsible for ensuring that all of this information is published and that all published documents are up to date.

245

The Administrator is responsible for the actual publishing.

246

Details about the publishing activities are described in CB-124 *Informationsledning*.

10.3 Information to Participants

247

The Administrator is responsible for providing the CCRA Participants with copies of documents covering significant aspects of the Scheme.

248

The Administrator is also responsible for providing the CCRA Participants with copies of the amendments or the new versions whenever changes are made to the documents or new versions are issued.

249

The table below indicates which information is to be provided and in which document the information is originally found.

250

Details about the procedures for providing information to the CCRA participants are described in CB-124 *Informationsledning*.

Information	Document/Source
The national set of rules and regulations for evaluation and certification/validation in accordance with mutually-agreed IT security evaluation criteria and methods	SP-002 Evaluation and Certification
The organisational structure of the Certification Body	SP-007 Quality Manual
The Quality Manual of the Certification Body	SP-007 Quality Manual
The accreditation or licensing/approval policy of the Certification Body	SP-004 Licensing of Evaluation Facilities
The titles and addresses of the ITSEF's associated with the Scheme and their status (e.g., governmental or commercial)	Licensing decisions from CSEC document archive
The national interpretation of ISO/IEC 17025: General requirements for the competence of testing and calibration laboratories.	SS-EN ISO/IEC 17025

10.4

Information Related to Accreditation

251

The Quality Manager is responsible for notifying the accreditation body, in writing, of any changes that might affect the Certification Body's ability to fulfil the conditions for accreditation. This includes the following.

- Change of key persons or key functions
- Organisational changes
- Physical moving of the whole or parts of the business to new premises, establishing new business premises, or closing down business at existing premises
- Loss of essential equipment
- Change of name of the legal entity
- Change of ownership
- Substantial change in the number of persons involved in work within the scope of the accreditation
- Use of subcontractors for work within the scope of the accreditation

11 Scheme

11.1 Scheme Documentation

252 The general description of the Scheme is documented in the following documents.

SP-001 Certification and Evaluation Scheme - Scheme Overview

253 This document contains a general description of the Scheme. It is the public top document of the Scheme. It is through this document that most external interested parties get information leading them further into the details of the Scheme.

254 The document contains a brief description about the Scheme and describes roles, definitions, and abbreviations important for the understanding of the information.

255 This is an informative document and is not to be regarded as controlling. It does not contain any information or specifications that are not declared or defined elsewhere.

SP-002 Evaluation and Certification

256 This document describes the policy and procedures for evaluations and certifications performed under the Scheme. It provides sufficient information to each party in the evaluation and certification process; defining their responsibilities for maintaining a consistent and high quality and for cost effectiveness.

SP-003 Assurance Continuity

257 This document describes the scheme for continuous maintenance of certifications.

SP-004 Licensing of Evaluation Facilities

258 This document describes the requirements and procedures for licensing and for the maintenance of licenses of evaluation facilities under the Scheme.

11.2 Scheme Owner

259 CSEC is the owner (Scheme Owner) of the Swedish Common Criteria Evaluation and Certification Scheme.

11.3 Relevant Standards

260 The Certification Body performs certification according to the official versions of the standards below. The details of the Scheme are described in the documents referred to in section 11.1, *Scheme Documentation*.

11.3.1 CCRA

261 The standard for how certification is performed is *Common Criteria for Information Technology Security Evaluation*, which includes the following documents.

- CC Part 1: Introduction and general model
- CC Part 2: Security functional requirements
- CC Part 3: Security assurance requirements

262 The methods for evaluations and certifications are described in *Common Methodology for Information Technology Security Evaluation (CEM)*.

263 The versions used are the latest versions approved by the CCRA.

11.3.2 ISO/IEC

264

The standard for how certification is performed is ISO/IEC 15408 *Information technology — Security techniques — Evaluation criteria for IT security*, which includes the following documents.

- ISO/IEC 15408 Part 1: Introduction and general model
- ISO/IEC 15408 Part 2: Security functional requirements
- ISO/IEC 15408 Part 3: Security assurance requirements

265

The methods for evaluations and certifications are described in ISO/IEC 18045 *Information technology — Security techniques — Methodology for IT security evaluation*

266

The versions used are the latest versions issued by ISO/IEC.

11.4 Certification Management

11.4.1 Information about Certification

267

The Certification Body provides information on the external web about the evaluation and certification procedures and the documents containing the requirements for certification, applicants' rights, as well as duties of suppliers of certified products (including fees to be paid by applicants or suppliers of certified products).

268

Information needed by the Certification Body personnel involved in certification can be found in Scheme publication SP-002 *Evaluation and Certification* and in the process description CB-111 *Certifying*.

269

For Evaluation and Certification of target of evaluations with cryptographic functionality, the Certification Body has a specific Policy described in SP-188 *Scheme Crypto Policy*.

11.4.2 Pre-evaluation

270

During pre-evaluation, the Certification Body shall:

- review the formal application for certification,
- ensure the ITSEF's ability to perform the certification,
- approve evaluator assignments,
- plan the certification project and assign personnel, and
- handle re-evaluations.

271

Details about the pre-evaluation activities are described in the procedures for *pre-evaluation* in Scheme publication SP-002 *Evaluation and Certification* and in the process description CB-111 *Certifying*.

11.4.3 Extending or Reducing the Scope of a Certification

272

Procedures for handling extending or reducing the scope of certification are described in Scheme publication SP-002 *Evaluation and Certification* and in the process description CB-111 *Certifying*.

11.4.4 Conduct of Evaluation

273

During the conduct of evaluation phase, the certifier shall:

- monitor the evaluation and
- review evaluation reports.

274 Details about conduct of evaluation activities are described in the procedures for *Conduct of evaluation* in Scheme publication SP-002 *Evaluation and Certification* and in the process description CB-111 *Certifiering*.

11.4.5 Conclusion of Evaluation

275 During the conclusion of evaluation phase, the Certification Body shall:

- verify that non-conformances are resolved,
- decide whether or not to certify a product,
- issue certificates,
- publish certificates and certification reports, and
- update the certified product list or certified protection profile list.

276 Details about conclusion of evaluation activities are described in the procedures for *Conclusion of Evaluation* in Scheme publication SP-002 *Evaluation and Certification* and in the process description CB-111 *Certifiering*.

11.4.6 Assurance Continuity

277 During Assurance Continuity, the Certification Body shall:

- maintain certification.

278 Details about Assurance Continuity activities are described in the procedures for *Assurance Continuity* in SP-003 *Assurance Continuity* and in the process description CB-112 *Rutiner för tillsyn och underhåll av certifikat*.

11.4.7 Certificate Surveillance

279 The Certification Body shall perform certificate surveillance, including:

- monitoring the use of certificates and marks,
- monitoring the supplier's handling of complaints, and
- handling misuse of certificates and marks.

280 Details about certificate surveillance activities are described in the procedures for *Certificate Surveillance* in Scheme publication SP-002 *Evaluation and Certification* and in the process description CB-112 *Rutiner för tillsyn och underhåll av certifikat*.

11.4.8 Withdrawal/Suspension of Certificates

281 The Certification Body shall withdraw certificates when appropriate.

282 Details about withdrawal of certificates are described in the procedures for *withdrawal of certificates* in Scheme publication SP-002 *Evaluation and Certification* and in the process description CB-112 *Rutiner för tillsyn och underhåll av certifikat*.

11.4.9 Certificate/Marking

283 The use of certification marks shall follow the requirements stated in Scheme publication SP-001 *Certification and Evaluation Scheme - Scheme Overview*.

284 Conditions for the use of trademarks applicable to the certification and licensing processes are listed in SP-070 *Conditions for the Use of Trademarks*.

11.5 ITSEF Management

285 The Certification Body shall:

- perform licensing of ITSEFs,

- provide a documented agreement between the Certification Body and the ITSEF consisting of the ITSEF application for licensing and the Certification Body acceptance of the application,
- publish a list of ITSEFs,
- perform audit and review of evaluation facilities, and
- provide guidance and technical support to evaluation facilities.

286 The procedures for Licensing of Evaluation Facilities are described in Scheme publication SP-004 *Licensing of Evaluation Facilities* and in the process description CB-110 *ITSEF Management*.

287 The Policy for licensing of Evaluation Facilities, and performing evaluations, outside Sweden is described in SP-191 *Cross Frontier Evaluation*.

288 Details about the publishing activities are described in CB-124 *Informationsledning*.

11.6 Mutual Recognition and International Liaisons

11.6.1 CCRA

289 Sweden has signed the Common Criteria Arrangement on the Mutual Recognition of Common Criteria Certificates in the field of Information Technology Security (CCRA), thus accepting CC certificates issued in other countries.

290 CCRA compliance ensures mutual recognition of CC certificates at EALs up to and including EAL 4, possibly augmented by Flaw Remediation, among the CCRA participants.

291 CSEC intends to follow, participate in, initiate, and lead activities aiming to promote IT security in general, and IT security evaluation in particular, both within and outside the CCRA framework.

292 As a CCRA-compliant Certification Body, CSEC must undergo a voluntary periodic assessment (VPA) at least once every five years, as requested by the CCRA Management Committee. During these assessments, it is CSEC's responsibility to support the assessment team to the greatest possible extent, sharing internal scheme documentation and evaluation documents, in accordance with the requirements of CCRA Annex D.

293 If Sweden is recognised as a Qualified Participant in CCRA, and CSEC achieves the status of an Associated CB, CSEC will share the responsibility for performing voluntary periodic assessments with any other Associated Certification Bodies.

294 When sharing protected information with other CCRA participants, for example during a voluntary periodic assessment, CSEC will follow the special rules described in CCRA Annex F.4, regarding the marking, storing, and safeguarding of such information.

11.6.2 EA MLA

295 Sweden participates through Swedac in the EA.

296 For further information about mutual recognition within EA see section 2.2, *European Accreditation Multilateral Agreement (EA MLA)*.

11.7 Interpretations

297 The uniform application of the requirements of the CC and the Common Methodology (CEM) over time within the Scheme is assured through the use of interpretations. This also applies to any Scheme-specific requirements, within the Scheme in question.

Swedish Certification Body for IT Security
007 Quality Manual

- 298 Whenever a situation occurs in the context of an evaluation the Scheme will have to
choose a course of action, possibly based upon subjective judgement. Such choices
must be documented as Scheme Notes.
- 299 In the Scheme, a request for clarification of the Scheme procedures, is called a request
for interpretation. The use of Scheme publication SP-094 *Request for Interpretation -
Form* is recommended, but not mandatory. If an Interpretations request is rejected the
person filing the request shall be informed about this by the Chief Operating Officer.
- 300 Scheme Notes relevant to the current version of the Scheme procedures must always
be considered in subsequent certifications.
- 301 Scheme Notes shall be processed in accordance with the procedures for change man-
agement.
- 302 Descriptions of the CSEC procedures for handling changes is found in SP-007 *Quality
Manual* and more detailed descriptions in CB-117 *Quality and Change Management*.

12 Customer Satisfaction

303 Feedback of any kind, from customers and other interested parties, regarding a project or any other matter concerning the activities of the Certification Body, should be handled based upon judgement from the person responsible for the matter.

304 Follow-ups will be performed during or after feedback originating from any of the following.

- Licensing
- Certification
- Spontaneous reactions

305 The Quality Manager is responsible for performing customer satisfaction surveys, using the questions in the form *Kundnöjdhetsundersökning – Blankett*. Customer satisfaction surveys are planned to be performed yearly. The Administrator is responsible for providing the list of customers for customer surveys. If there has been no progress in a project since the last answered survey that customer may be excluded from the list of customers for customer surveys that year.

306 If the survey is performed during a meeting the result should be documented in *Kundnöjdhetsundersökning – Blankett* or in minutes or a protocol from the meeting. All non-conformances are documented as change requests according to the procedures described in CB-117 *Quality & Change Management*.

307 The result from customer satisfaction surveys are reported to the Scheme Advisory Committee.

308 Spontaneous customer reactions are registered in the Task Management System by the member of personnel who receives the matter.

309 Complaints are handled according to the procedures for handling complaints, described in section 13, *Complaints and Appeals*.

13 Complaints and Appeals

310 The purpose of the procedures for management of complaints and appeals is to ensure that:

- the Certification Body has suitable policies and procedures for the resolution of complaints and appeals,
- details of the procedures for handling complaints and appeals are documented and published according to applicable standards,
- the Certification Body has procedures to correct decisions that are not made according to the rules of the Scheme, and
- the Certification Body has procedures to learn from any complaints or appeals and to update the Scheme accordingly.

311 A detailed description of the procedures for management of complaints and appeals are found in this section.

312 Only complaints and appeals that apply to the certification activities of the Certification Body will be addressed using the procedure below. Other complaints or appeals may, if deemed relevant, be handled as change requests but without any formal status.

13.1 Complaints

313 The Certification Body will document and investigate any complaint directed towards it that applies to the certification activities for which it is responsible.

314 All such complaints will be registered as change requests that will be handled according to the procedures described in CB-117 *Quality & Change Management*. To separate Complaints from other change requests the title will begin with the keyword *Complaint*.

315 All identified nonconformities will be handled according to the procedures for handling nonconformities described in section 7.4, *Internal Audits*.

316 The Quality Manager is responsible for:

- confirming whether the complaint relates to the certification activities,
- informing the complainant that the complaint has been received and that it will be treated as a complaint,
- documenting and recording the complaint as a change request and presenting it to the Change Control Board for further handling,
- ensuring that the complaint is investigated and handled at the proper level of authorisation within the Certification Body, and
- ensuring that all nonconformities are handled accordingly.

317 The person to whom the complaint is assigned is responsible for:

- investigating the complaint and if necessary seeking the aid of impartial and independent technical experts;
- determining whether the decision made or action performed has been made on false grounds, in conflict with the scheme regulations (ISO/IEC 17065:2012, CC, CEM, scheme specific documents), or for any other reason is found to be incorrect;
- establishing a plan for implementation of corrective actions; and
- documenting the corrective actions taken in the change request, and reporting to the Change Control Board.

318 The resolution of the Complaint is handled according to the normal procedures for
change requests.

319 The Head of the Certification Body is responsible for the decision, at the Change Con-
trol Board, about a complaint.

320 When the Complaint has been closed, the Quality Manager will:

- ensure that the complainant is informed about the outcome of the complaint,
- inform the complainant of his/her right to appeal,
- report the complaint and the corrective actions to the Head of the Certification Body and ensure that further identified nonconformities are reported and handled, and
- ensure that relevant documentation is placed under document control.

321 The Head of the Certification Body will:

- make the complaint available to the Scheme Advisory Committee upon request.

322 Forms for complaints can be found on the CSEC website: <http://www.csec.se>. The use of these forms is not mandatory.

13.2 Appeals

323 A complainant that is not satisfied with a decision, or with the outcome of a com-
plaint, that applies to the certification activities for which the Certification Body is re-
sponsible may file an appeal.

324 The appeal shall be made within 30 days of the original decision, it shall be made in
writing, and it shall contain the following information:

- the decision that is appealed;
- the requested change; and
- the name, address, and telephone number of the appellant.

325 To preserve the impartiality of the appeals process, appeals are handled by personnel
not involved in the decision appealed.

326 The appeal is handled by the Quality Manager and is registered as a change request for
reference.

327 The decision about the outcome of the appeal is made by the Head of the Certification
Body.

328 The decision about the outcome of the appeal shall be approved by the Senior Execu-
tive.

329 The Quality Manager is responsible for:

- confirming whether the appeal relates to the certification activities;
- documenting the appeal as a change request;
- checking that the appeal has arrived in time and contains all necessary infor-
mation;
- informing the appellant that the appeal has been received and that it will be treated
as an appeal;
- investigating and handling the appeal, and proposing consequent actions
(if necessary, the aid of impartial and independent technical experts shall be used);
- determining whether the decision under investigation has been made on false
grounds, in conflict with the scheme regulations (ISO/IEC 17065:2012, CC, CEM,
scheme specific documents), or if it contains errors; and

Swedish Certification Body for IT Security
007 Quality Manual

- presenting the appeal, and the investigation, to the Head of the Certification Body who is responsible for the decision about the appeal.

330

The Head of the Certification Body is responsible for:

- making the decision about the appeal; and
- presenting the appeal, the investigation, and the decision about the appeal to the Senior Executive who is responsible for approval of the decision.

331

When the decisions about the appeal are made and approved, the Quality Manager is responsible for:

- ensuring that the appellant is informed about the outcome of the appeal,
- making the appeal and the final conclusion available to the Scheme Advisory Committee,
- ensuring that documentation relevant to the resolution of the appeal and all subsequent actions are placed under document and record control in the Task Management System, and
- ensuring that all identified nonconformities are reported and handled.

332

Forms for appeals can be found on the CSEC website: <http://www.csec.se>. The use of these forms is not mandatory.

14 Subcontractor Management

333 Detailed descriptions of the procedures for handling subcontractors can be found in
FMV VHL.

334 In addition to these instructions, some specific rules and procedures are applicable to
the Certification Body.

14.1 Evaluation and Purchasing

335 In addition to the FMV processes for subcontractor evaluation and purchasing, the
Head of the Certification Body is responsible for:

- ensuring that all necessary means are available for the activities for which the sub-
contractor is contracted;
- establishing a strategy, together with the appointed administrator of commercial
dealings at FMV, for purchasing including stipulate requirements so that all sub-
contractors are informed about the applicable requirements of ISO/IEC
17065:2012;
- together with the appointed PL, approving any subcontractor according to their
compliance with the related requirements of ISO/IEC 17065:2012;
- ensuring that the subcontracted body or person is competent and is not involved
either directly or through the person's employer with the design or production of
any product under evaluation in such a way that impartiality would be compro-
mised; and
- ensuring that the subcontracted body or person gives undertakings regarding mar-
keting of their services in line with the requirements on the Certification Body.

336 Since *the Public Procurement Act* (2007:1091) applies to the Certification Body, no
list of approved subcontractors is maintained within the Certification Body. In some
cases FMV will have general agreements with a number of subcontractors. In these
cases all subcontractors with which FMV has signed general agreements will be re-
garded as approved according to the conditions of the procurement.

337 The Head of the Certification Body is responsible for documenting the criteria for
selection of subcontractors involved in testing or inspection.

14.2 Agreement

338 The Head of the Certification Body is responsible for obtaining the applicant's consent
in any case where the Certification Body decides to subcontract work related to certi-
fication.

339 Together with the appointed administrator of commercial dealings at FMV, the Head
of the Certification Body has to establish a contractual agreement on each occasion
when a subcontractor performs work within the Scheme for the Certification Body.

14.3 Conflict of interests

340 If a subcontractor will be involved in certification activities, the agreement shall be
complemented with the *CB-057 CSEC Impartiality agreement – Form*, as described in
section 8.5, *Agreement*.

341 Any situation which may present the subcontractor with a conflict of interests shall be
reported to the management of the Certification Body.

14.4 Operations

342

After a subcontractor is contracted, the Head of the Certification Body is responsible for:

- specifying the requirements for any tests or inspections performed by the subcontracted body after input from Chief Operating Officer and Lead Certifier
- taking full responsibility for all subcontracted work and for ensuring that the Certification Body maintain its responsibility for granting, maintaining, extending, suspending, or withdrawing certification; and
- ensuring that the subcontracted body or person is competent and is not involved either directly or through the person's employer with the design or production of any product under evaluation in such a way that impartiality would be compromised.

343

The Quality Manager is responsible for implementing appropriate corrective action in the event that subcontractors operate in breach of the undertakings that they have given.

14.5 Surveillance

344

The Head of the Certification Body is responsible for ensuring that subcontractors never operate in breach of the undertakings that they have given.

345

The Quality Manager is responsible for assessing, monitoring, and recording the performance of any subcontractor performing work within the Scheme to ensure that any work carried out by a subcontracted body gives the same confidence as work carried out by the Certification Body itself.

15 Security

346 To protect confidential information from unauthorised disclosure, the Certification
Body has policies and procedures for information security complemented by proce-
347 dures for physical security.

The procedures for physical security also serve purposes of protection against theft,
fire, and personal injury.

348 Security procedures have been established and adopted for use by the Certification
Body in the following areas.

- Security organisation
- Personnel regulations
- Logical access control
- Physical access control
- Information classification
- Handling confidential information
- Security planning
- Security analysis
- Incident reporting
- Visitor control
- Mechanical burglary protection
- Alarm protection
- Alarm distribution
- Guard duty

349 The procedures are described in detail in VB-102 *Lokal Säkerhetsskyddsföreskrift*
(English: Local Security Regulation).

350 The local procedures are complements to and specialisations of the overall security
regulations and procedures of FMV. Those regulations cover a wide range of areas
and are based on the requirements of ISO/IEC 27001, where this has been applicable.

Appendix A Classification of Nonconformities

A.1 General Classification

351 Findings from, for example, Internal Audits are classified according to definitions in
the table below.

352 It should be noted that a non-conformity, by definition, implies that a requirement isn't
met or that a task is not performed as decided.

353 All findings should be stated relative to documented requirements or criteria pre-
scribed by the Scheme or by the standards or agreements upon which the Scheme is
based.

Major	<p>A finding that implies:</p> <ul style="list-style-type: none">- a vital function does not exist, or- the total breakdown of a vital function <p>in such a way that a requirement is not fulfilled.</p> <p><i>Explanation</i></p> <p>This classification is used when a procedure important to fulfil a requirement does not exist in the quality management system and when the requirement subsequently is not fulfilled in the actual work.</p> <p>This classification may also be used when the requirement is addressed in a satisfactory manner in the documentation but where the actual work does not conform to the documentation.</p> <p>For a non-conformity to be classified as major the requirement that is not fulfilled should be relevant to the Certification Body.</p>
Minor	<p>Finding that implies that a function does not completely fulfil a requirement.</p> <p><i>Explanation</i></p> <p>This classification is used for non-conformities in actual work resulting in a requirement not being fulfilled but where the requirement would be fulfilled if the documented procedures were followed.</p> <p>For such a non-conformity to be classified as minor there should be proof that there are only single occurrences of the non-conformity and that the requirement is normally fulfilled.</p> <p>This classification may also be used when the documented procedure would not fulfil a requirement but where the requirement is fulfilled in the actual work.</p>
Observation	<p>Finding that has no or limited effect on the possibility to fulfil a requirement.</p> <p><i>Explanation</i></p> <p>This classification is used when the actual work does not conform to what is documented but where it is judged that the requirements are still satisfactorily fulfilled.</p> <p>It may also be used in similar cases when a documented procedure is judged unnecessary to fulfil requirements.</p> <p>Both of these cases would indicate that a change to the Quality Management System would be suitable.</p>

Improvement Suggestion for improvement of documentation or procedures.

Explanation

This is a classification that may be used for any proposal that is aimed at improving our way of work to make it more effective or efficient.

A suggested improvement is not related to a non-conformity.

354

This classification may also be used in the process of licensing, or license surveillance, of Evaluation Facilities.

A.2 Findings in Document Reviews

355

The general classification primarily aims at the implementation of a function or a requirement, rather than defects in single documents. When used in document reviews, the following definitions may be used.

Major A procedure to resolve a vital requirement allocated to the document is missing.

Minor A requirement allocated to the document is not completely resolved by the described procedures.

Observation A finding that is not related to the ability to fulfil requirements.
