Clarification of Name and Official Position within the Company

1 Introduction

1.1 Introduction to FMV

FMV (Swe. Försvarets materielverk, Eng. The Swedish Defence Materiel Administration) shall in accordance with the investment plan and assignment of SwAF (Swe. Försvarmakten, Eng. The Swedish Armed Forces) be responsible for procurement of works contracts, supply contracts and service contracts in the area of material supply not included in the procurement responsibility of SwAF.

More information about FMV is available at www.fmv.se/en/.

1.2 Important clarification regarding rating:

The descriptions provided in this Registration Form will be rated in accordance with the criteria described in Appendix 5 Rating text document. Applicants are encouraged to:

- Provide concrete, measurable and verifiable statements where possible
- Distinguish clearly between existing capability and planned future development
- Identify assumptions, dependencies and external requirements
- Describe both strengths and known limitations

1.3 The Reply form

This Reply form is to be used for providing the requested information and describing the Solution to the stated military challenge presented in the Invitation.

The Reply form is primarily used for the selection of solutions for Battle Week. The Battle Week aims to demonstrate and verify military utility in the protection of critical infrastructure, see section 3.3 Military Challenge. Battle Week does not constitute a procurement does not create any contractual obligation and does not confer exclusivity.

All sections of this Reply form must be completed. In cases where Yes/No options are provided, they shall be answered by marking the appropriate box. Descriptions shall be provided in the text fields available in each section. The field is designed to expand as text is entered.

An Applying company may submit a maximum of two (2) Applications in total for this Invitation to Battle Week. In cases where an Applying company submits two (2) Applications, it is essential that it is clearly indicated which attached documents relate to each respective Application.

Suppliers with a civilian or commercial background are not expected to possess detailed knowledge of military doctrine, terminology or organizational structure. FMV will rate the military relevance of the solution in the applicable context.

2 Administrative conditions

2.1 Commercial secrecy

The information given to FMV is subject to the Swedish Public Access to Information and Secrecy Act (2009:400). Documents and information received by Swedish authorities are covered by the principle of public access to official records and must therefore, if they are not subject to secrecy under the Swedish Public Access to Information and Secrecy Act (2009:400, OSJ), be disclosed to the public on request.

Comments:

2.2 Sharing of information submitted to FMV

Do you accept that FMV shares your submitted Application with Swedish Armed Forces, Swedish Defence Research Agency, Swedish Defence University and Swedish Ministry of Defence?

Yes **No**

Comments:

2.3 Costs for submitting a response to this Invitation to Battle Week

This invitation to Battle Week is intended solely for information gathering and does not entail any obligation for FMV to conduct a procurement or enter into a contract. FMV assumes no responsibility for any costs or expenses incurred by companies choosing to respond to this Invitation to Battle Week, including but not limited to costs for labor, materials, consulting services, or other resources.

Furthermore, no company submitting information within the scope of this Invitation to Battle Week will receive any form of financial or other compensation from FMV, either now or in the future, for its participation. Submitted responses and participation during the Battle Week are considered voluntary and do not entitle the respondent to any compensation, either directly or indirectly.

2.4 Information and questions regarding the Invitation to Battle Week

Questions regarding this Invitation to Battle Week can be made to the following e-mail address:

t&ebusiness.fmv@fmv.se

Questions and answers will be published at:

<https://www.fmv.se/battleweek> - Swedish language

<https://testandevaluation.fmv.se/battleweek> - English language

2.5 Submission of response to the Invitation to Battle Week

The response must be submitted in electronic form to t&ebusiness.fmv@fmv.se

Responses submitted after April 29, 2026, may not be eligible to participate in Battle Week.

2.6 Preliminary timeline

March 4	Distribution of Invitation to Battle Week
April 29	Last day for submission of a registration to the Invitation to Battle Week
April 30 – May 13	During this period FMV reviews the submitted responses and will ask for clarifications if needed.
May 14	FMV will notify Applicants of the result of the selection process for participation in Battle week
June 15 – 17 (week 25)	Site-survey at test range / Main planning conference
September 14 – September 25	Battle Week
September 28 – October 9	Evaluation of tests and demonstrations

3 A Military challenge

Protection of Critical infrastructure

- Protect ground based static critical infrastructure, for example radar systems, against modern threats in all conflict levels.

4 Proposed solution to the Military challenge

4.1 Brief description of the Solution

4.1.1 Please state how the Solution contribute to solving the Military challenge. Please state at least:

- Description of the Solution
- Type of infrastructure to be protected
- Function or effect provided by the Solution

Please clearly state whether the submitted solution concerns:

- A complete system
- A subsystem
- A software component
- A function or capability module
- Other

If a subsystem: specify what part of a system it addresses (detection, processing, decision support, effect, resilience etc.).

Description (maximum 500 words):

4.2 Military operational relevance

4.2.1 Please state the military benefit in safeguarding the Infrastructure instate a technical description of the proposed solution. How well the solution addresses the detection and/or neutralization of threats to Sensor Chain. The following constitute examples of possible descriptions (may be described in non-military/civilian terms):

- Function and operational effect
- Earlier detection → improved early warning
- Reduced disruption → increased availability
- Automatic recovery → enhanced resilience
- What potential threat(s) are mitigated?
- What measurable operational improvement is achieved? Please state e.g., earlier detection by X seconds/minutes, reduced downtime, increased availability, reduced manpower etc.
- What assumptions must be fulfilled for the Solution to work as intended?

Description (maximum 500 words):

4.3 Time to Battle Week / Delivery time

4.3.1 Please provide an estimated timeframe from May 29 2026 to when the solution will be ready for test and demonstration during the Battle Week.

4.3.2 Please provide an approximate time estimate from contract signing to when the Solution will be ready for delivery. Although this is not a procurement, FMV would like to know the approximate delivery time for the submitted solution, calculated from a date of contract signing.

Description (maximum 400 words):

4.4 Testability / Verifiability / System integration capability

4.4.1 Please describe the feasibility of testing and demonstrating the Solution during Battle Week (particularly important for subsystems). The following constitute examples of possible descriptions (may be described in non-military/civilian terms):

If the Solution requires integration with other systems, the Applicant shall describe:

- The level of integration required for testing:
 - Stand-alone demonstration
 - Read-only data access
 - Bidirectional data exchange
 - Command and control integration
- The number and type of interfaces required (API, hardware interface, RF interface, data format, manual interface etc.).
- Whether open standards or established protocols are used and if there are any exceptions.
- Known integration dependencies or constraints.
- Whether the Solution can operate in a sandboxed or isolated environment and if integration with operational systems is not possible.
- Type of interface (API, hardware interface, RF interface, data format, manual interface etc.)
- The observable effect(s) resulting from the Solution that can be demonstrated
- What input data or scenarios are required?
- Whether simulation, synthetic data or manual triggering is required
- What metrics will confirm successful performance?

FMV must be able to assess the complexity, risk and feasibility of integration during Battle Week.

It is not necessary to state all of the above since these bullet points are listed as examples.

If integration is not possible please describe how the solution can be demonstrated in an isolated or sandboxed environment.

Note: simulation or manual interfaces are fully acceptable

Description (maximum 500 words):

4.5 Innovation & Potential

4.5.1 Please describe the innovative elements of the Solution and its potential to create improved protection capability within the scope of the Military Challenge. The following constitute examples of possible descriptions (may be described in non-military/civilian terms):

The purpose of this section is to enable FMV to assess the degree of innovation and the potential technological or operational advantage of the proposed Solution.

Innovation may relate to technology, methodology, integration approach, operational concept, or a novel combination or application of existing technologies.

The Applicant is invited to describe:

- What is genuinely new or different compared to existing solutions
- Whether the Solution introduces new technology, a new method, or a new application area
- If based on established technology, how it is used in a new or combined way
- How the Solution differs from current alternatives
- The potential for decisive improvements in protection of critical infrastructure
- Whether the innovation could provide technological advantage within the Battle Week challenge

Description (maximum 500 words):

4.6 Cost effectiveness

4.6.1 Please provide a budgetary estimate for a complete technical Solution and services.

- Acquisition cost
- Integration cost
- Annual operating cost
- Personnel requirements
- Maintenance and upgrade costs
- Estimated life-cycle cost and resource efficiency.
- Value for investment relative to operational impact.

Please distinguish between identifying key cost drivers and assumptions.

Description (maximum 500 words):

5 Test and demonstration preconditions

5.1 Please specify and describe the equipment and system setup required for your solution to be tested and demonstrated (This includes but is not limited to required support systems, targets, threat systems, technical measurements, technical documentation).

Description (maximum 400 words):

5.2 Please provide any further information deemed necessary for FMV to evaluate the Solution.

Description (maximum 400 words):

6 Other

6.1 In case you will be offered to participate in the Battle Week and any of the below is applicable for your solution and tests, you are required to submit this information preferably together with your application, and no later than May 8. Timely submission is essential to enable FMV to properly prepare and conduct the tests and demonstrations.

- FMV needs information regarding system safety information and environmental data.
- System safety data sheet with information regarding weapon danger area/safety footprint, type of explosives, weight of explosives, hazardous substances.
- Type of ammunition and product name.
- Laser safety data sheets.
- Safety assessment report incl. risk analysis and system safety statements.
- Information regarding needed radio frequencies and transmitter effect
- Information regarding destruction of OXA.
- FMV may request further information regarding your solution.

Please state if any of the above is applicable for tests and demonstrations of your solution.

Description (maximum 400 words):

6.2 In case you will be offered to participate in the Battle Week, FMV will need the following practical information:

- Approx. number of participants from your company at the Battle Week
- Information regarding transportation from your site to the FMV test range
- Information if your company will send any hazardous goods to and from the FMV test range
- Information regarding storage requirements
- Information regarding any special storage requirements such as locked storage facility, surveillance or other measurements.
- Information regarding need for parking spaces for vehicles needed for the solution (not for personal transport)

Please state information regarding the above:

Description (maximum 400 words):
